

Building Electrical Service - Electrical service was last upgraded in the late '70's. Currently, the existing switchboards are Federal Pacific Electric Co. (FPE). FPE has been out of business for over 25 years and parts are very difficult to find for any repairs or expansion. The service sizes are small to meet current electrical demands. Some existing switchboards do not contain ground fault protection and current code requirements. The existing switchboards do not contain transient voltage surge suppression. Buildings scheduled for upgrades include:

- A) Briscoe Administration Building – Friday June 24 – 27, 2016
- B) Morelock Academic Building – Friday June 10 – 13, 2016
- C) Fine Arts – Friday June 17 – 20, 2016
- D) Graves – Pierce Building – July 1 – 4, 2016
- E) Central Plant - July 1 – 4, 2016
- F) Industrial Tech – July 8 – 11,

Project Status

- Contract has been let with Alpha Building Corporation (San Antonio) and the project will begin the June 8 and be complete by July 11, 2016. A schedule of building work is above. There will be NO SERVICE to the buildings on the dates indicated from 5:00 pm. on Friday to no later than 7:00 am on Monday.
