SRSU Instructional Services/Blackboard Support: Blackboard Student Retention Tools

(1) The Blackboard Attendance Tool
Many instructors who teach face-to-face and blended courses use attendance data as part of their students' overall grades. Also, some institutions and programs have attendance policies that require instructors to track the number of class meetings students have missed and use attendance to focus on student retention. With the Attendance tool activated, you can mark whether a student is present, late, absent, or excused. The attendance records for each student appear in a single column next to assignment grades. You can also use attendance as part of grade calculations just as you can for an assignment grade column.

For more information on the Attendance Tool:
Original Course View: https://help.blackboard.com/Learn/Instructor/Original/Grade/Attendance
Ultra Course View: https://help.blackboard.com/Learn/Instructor/Ultra/Grade/Attendance

(2) The Blackboard Retention Center
The Blackboard Retention Center helps you discover which students in your course are at risk. Based on default rules and rules you create, students' engagement and participation are visually displayed, quickly alerting you to potential risk. From the Retention Center, you can communicate with struggling students and help them take immediate action for improvement.

For more information on the Blackboard Retention Center (Original Course View Only):
https://help.blackboard.com/Learn/Instructor/Original/Performance/Retention_Center
ALSO - View "The Retention Center in Blackboard" webinar recording found in your "SRSU Faculty Central - Teaching Online with Blackboard” area “BB Original -Webinar Recordings” Folder.

(3) The Blackboard Impact Course Report (previously EesySoft)
With the Impact Course Report, you can access course activity key figures, tool adoption metrics and user activity reports. With this report, you will be able to see which students are visiting your course, reading your announcements, viewing your content, and how often they are accessing your course tools within a specific time period. Impact Course Reports allow you to track how your students are accessing content and tools in your course and can be used to identify students who may need extra support.
